Mobile Developer (Entry-Level)

Toronto, ON

PROFESSIONAL SUMMARY

Analytical Mobile Developer with hands-on experience building **native Android (Kotlin) and iOS (Swift)** applications. Skilled in **end-to-end development**—from UI/UX design and REST API integration to comprehensive testing and debugging using modern **MVVM/MVC architecture patterns**. Experienced in **Agile/Scrum workflows** and dedicated to delivering **maintainable, testable, and performant software**. A proactive learner eager to contribute to Konrad's mission of creating best-in-class digital products.

TECHNICAL SKILLS

- **Mobile & Frameworks:** Kotlin, Swift, Java | Android Studio, Xcode, UIKit, MapKit
- **Architecture & Patterns:** MVVM, MVC, Clean Architecture | Repository Pattern
- **Data & APIs:** REST APIs, Retrofit, Room Database
- **Tools & Platforms:** Git, GitHub, VS Code, Adobe XD
- **Web & Practices:** React, JavaScript, HTML5, CSS3 | Agile/Scrum, Code Reviews, Unit Testing, Debugging, Mobile UI/UX

INDUSTRY EXPERIENCE (INTERNSHIP)

Software Developer Intern | Digital Solutions Lab – triOS College,

Toronto, ON | January 2026

- **Agile Team Collaboration:** Contributed to a cross-functional 4-developer team, participating in **daily stand-ups, sprint planning, and retrospectives** to ensure timely feature delivery.
- **Full-Stack Development:** Built front-end features with React and integrated **RESTful APIs**, improving **data flow and application stability**.
- **Code Quality & Review:** Conducted peer code reviews, enforcing clean code standards and enhancing maintainability.
- **Problem Resolution & Optimization:** Debugged and resolved **15+ production-level issues**, improving **application responsiveness and user experience**.

MOBILE DEVELOPMENT PROJECTS (CAPSTONE PROJECTS)

Android Finance Tracker – Native Android App

Architecture: MVVM | Technologies: Kotlin, Room Database, Coroutines

- Designed and implemented a **full-featured finance tracking app** using **MVVM architecture** and **Repository Pattern** for maintainable code.
- Leveraged **Room Database** and **Kotlin Coroutines** for high-performance local persistence and non-blocking UI.
- Established a comprehensive **unit testing suite**, reducing critical runtime defects by **~90%**.
- Developed a responsive **Material Design UI** for intuitive navigation and data visualization.

iOS Campus Navigator – Native iOS App

Architecture: MVC | Technologies: Swift, UIKit, MapKit, Core Location

- Researched and integrated **MapKit** and **Core Location** to provide **real-time positioning and campus routing**.
- Applied **MVC pattern** to separate business logic from UI components, improving maintainability.
- Optimized pathfinding algorithms and memory handling, achieving **~40% faster responsiveness**.
- Explored emerging Swift frameworks to enhance workflow and shared insights with the team.

EDUCATION

Ontario College Diploma – Mobile Web Developer Using AI

triOS College, Toronto, ON | Graduated: January 2026

- 20-month intensive program with a **16-week hands-on internship**.
- Core Competencies: **Native Mobile Development (Kotlin/Swift), REST API Integration, Agile Methodologies, Software Testing**
